1. The following is an examiner's statement of reasons for allowance: applicant's arguments in the amendment filed 09 May 2005 that Sawada et al. '305 do not inherently anticipate or render obvious the instant claimed surface area ratio and steepness values of independent claims 1, 3, and 6 are accepted. These features in combination with the other limitations of the independent claims define over the cited art. The examiner notes that the EPO search report filed with the IDS of 15 June 2005 has numerous "X" references that are said to anticipate the claims of the EPO application. The examiner notes that on "Sheet C" of the EPO report, the EPO searcher states that numerous surface area and steepness values in the EPO claims were given no weight as being unsearchable. As the instant claims are definite and enabled under U.S. practice, all limitations are given weight as noted in the above statement of allowable subject matter. Considered in terms of the instant claim construction, the numerous "X" references on the EPO search report do not anticipate the instant claims and are merely cumulative to Sawada et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
